Tennis
for All

WHAT ARE YOU
DOING TO DEVELOP
YOUR NEXT WIMBLEDON CHAMPION?

Whatever your fencing requirement Steelway Fensecure has the solution. Steelway have been supplying tennis court fencing all over the country for over 75 years. From refurbishment projects to new build our dedicated team of professional sales and technical support staff are on hand to help and advise you on the correct specification. As a customer buying from a SAPCA accredited supplier you can be sure of our professional competence and performance. Our clients include The National Tennis Centre; home of the LTA, Buckingham Palace (as seen on TV in the 2000 famous charity match with Borg vs McEnroe) plus several schools and LTA clubs across the UK, Jersey and Spain.

FENCING, SPORTS & AMENITY PRODUCTS

STEELWAY FENSECURE'S TUBULAR FENCING SYSTEM IS THE FIRST CHOICE OF THE SPORTS PROFESSIONAL.

Manufactured in accordance with the LTA guideline specification our system is fully galvanized to prevent corrosion and polyester powder coated in green or black to suit the court surroundings.

Clad with PVC coated with galvanized core Chainlink this offers the perfect backdrop to a highly charged game. The 50mm aperture of the Chainlink is smaller than the recommended tennis ball size ensuring that the game is not lost due to balls escaping. In addition the flexibility of the Chainlink reduces the rebound effect that is often found on stiffer mesh systems.

Ideal for tennis clubs, schools, parks and domestic courts. Available in heights from 900mm up to 4.0m high with matching single and double leaf gates. Why not create your own style of court with drop sides or American corners? Go on make your court and players the envy of others. A full range of fencing systems are available for more heavy duty applications.

FEATURES & BENEFITS:

- The top rail gives added strength to the fence, stopping the Chainlink from sagging.
- No struts on the corner posts provide you with easier access around the perimeter of the court and removes the potential trip hazard.
- Optional bottom and middle rails provide added strength and extend the life of your fence.
- Suitable for wind breaks.
- Available with Linkguard protection on low level fencing as an additional safety feature.

As part of the Steelway range of products we also manufacture and install a full range of fencing, gates, multisport equipment, balustrades, hand railing, staircases, walkways, ducting, access covers and frames and provide a full bespoke fabrication service.

REFURBISHING TENNIS COURTS ACROSS THE COUNTRY
